About Wireshark

[About](#)[Features](#)[Awards and Accolades](#)[Authors \(/about.html#authors\)](#)[SharkFest](#)

Wireshark is the world's foremost and widely-used network protocol analyzer. It lets you see what's happening on your network at a microscopic level and is the de facto (and often de jure) standard across many commercial and non-profit enterprises, government agencies, and educational institutions. Wireshark development thrives thanks to the volunteer contributions of networking experts around the globe and is the continuation of a project started by Gerald Combs in 1998.

Take Wireshark to New Depths Heights with Riverbed Technology

Riverbed is Wireshark's primary sponsor and provides our funding. They also make great products that fully integrate with Wireshark.

I have a lot of traffic...

ANSWER: SteelCentral™ Packet Analyzer PE

- Visually rich, powerful LAN analyzer
- Quickly access very large pcap files
- Professional, customizable reports
- Advanced triggers and alerts
- Fully integrated with Wireshark

Learn More (<https://www.riverbed.com/products/steelcentral/steelcentral-packet-analyzer-personal-edition.html>)

Buy Now (http://www.cacotech.com/products/catalog/product_info.php?products_id=57)

No, really, I have a LOT of traffic...

ANSWER: SteelCentral™ AppResponse 11

- Full stack analysis – from packets to pages
- Rich performance metrics & pre-defined insights for fast problem identification/resolution
- Modular, flexible solution for deeply-analyzing network & application performance
